

CDN Incident Alert: 0080. TLP: CLEAR		Date
Title	PL Lega Artis' Rise to Prominence: Inadequate Mechanisms for Curbing Kremlin Propaganda in the Polish Infosphere	08/08/2025

Summary

- During the Polish presidential elections, Lega Artis, an alleged legal practice turned news outlet, was translating EU-sanctioned Russian state-controlled media to Polish and republishing them on their website, before sharing them on their social media channels.
- Lega Artis has 22k followers across social media platforms and seems to have a significant readership.
- Lega Artis is distributing Russian-sanctioned media content and smearing Ukraine by leveraging their existing inauthentic news website, where they publish AI-generated and laundered articles. The operation is hiding the origin of the articles and then sharing them on social media, circumventing EU sanctions against Russian state-controlled media.
- Social media platforms have been alerted about Lega Artis' presence and activities on their platform. The platforms are recommended to geo-fence the pages to not violating EU sanctions. Polish authorities should investigate Lega Artis' ownership and affiliations.

Incident

During the Polish presidential election period, Polish-language Lega Artis, translated and republished, without attribution, content from Russian-sanctioned media on their website, discrediting Ukraine, and sharing the articles on their X and Telegram channels. Lega Artis is an alleged law practice turned into an information laundering machine.

While the operation has been [exposed](#) in the past, the social media platforms have seemingly not acted against it. Due to the content amplification pattern they used during the elections, sharing screenshots of the articles and links on other platforms, like Instagram and TikTok, it is unknown if Lega Artis is also sharing sanctioned content on these platforms. The ownership, funding structure, and incentives to launder the illegal content are unknown. After the presidential elections, Lega Artis established new social media channels and started posting more diverse and viral content, likely working to build a following and maximise their reach.

Narrative

Meta narrative: N/A

Sub-narratives: N/A

Impact

Reach: Across social media platforms, the Lega Artis has 22.000 followers. It is unknown how many views they gained on sanctioned content. A 2024 investigation shows that the website had significant readership, but we have been unable to verify this.

Outcome: N/A.

Key Objectives and Behaviours (DISARM Red Framework)

Objective: [T0002: Facilitate State Propaganda](#) – Lega Artis is laundering Russian EU-sanctioned content.

Objective: [T0135.001: Smear](#) – the website is also discrediting Ukraine.

[T0098.002: Leverage Existing Inauthentic News Sites](#) – Lega Artis initially started posting Covid-19 disinformation, before starting to launder Russian EU-sanctioned content. While they are posing like a news website to gain legitimacy, the influence operation is not applying any journalistic norms.

[T0085.001: Develop AI-Generated Text](#) – the frequency of content created indicates the use of AI to translate and create content.

[T0129.003: Break Association with Content](#) – the operation is laundering content from EU-sanctioned Russian state-controlled media by translating them and republishing it on their website without attribution.

[T0121.001: Bypass Content Blocking](#) – the operation is republishing sanctioned media content to their website and sharing it on social media platforms, avoiding automated content blocking of sanctioned Russian state-controlled media.

Recommendations and Actions Taken

Actions taken: The alert is sent to social media platforms to inform them about the operation laundering

sanctioned content.

Recommendations: The social media platforms should geo-fence Lega Artis from European audiences due to their systemic sharing of sanctioned content. The Polish state should investigate Lega Artis’s ownership and source of funding.
